Results for the first half of the fiscal year showed strong progress against the annual forecasts of 370.0 billion yen which we announced in the fiscal year 2021 earnings announcement (May 10, 2022) due to both the mineral resources and non-mineral resources businesses performed well as the company steadily incorporated profitable business opportunities associated with the global economic recovery and soaring commodity prices.

Taking these circumstances into consideration, we have revised the annual forecasts of profit for the year attributable to owners of the parent to 550.0 billion yen, 180.0 billion yen increased from the previous forecasts of 370.0 billion yen.

Date of record : Interim – September 30, 2022

Year-end – March 31, 2023

(3) Reason for the revision

Sumitomo aims to increase dividends by achieving medium and long-term earnings growth while adhering to its fundamental policy of paying shareholders a stable dividend over the long term.

Company's policy on shareholder returns for FY 2022 and beyond is as follows: we will decide the amount of annual dividends within a DOE(dividend on equity ratio) range of 3.5% to 4.5% by taking into consideration the fundamental earnings capacity, cash flows, and other factors with a consolidated payout ratio of 30% as a guideline. If 30% of the profit for the year exceeds the above range, we will pay dividends or repurchase our shares for the excess portion in a flexible and agile manner.

Due to the fact that our annual forecast of profit for the year attributable to owners of the parent is revised to 550.0 billion yen, the annual dividend for the fiscal year is revised to 115 yen per share (latest plan was 90 yen per share), which is the upper threshold of the DOE range. The interim dividend is 57.50 yen per share, half the amount of planned annual dividend, (the interim dividend in the previous fiscal year was 45 yen per share).

Further, we will pay dividends and/or repurchase our shares for the excess portion in a flexible and agile manner.
