Sumitomo Corporation's Legacy and Beginnings

Sumitomo Corporation of Americas

Enriching lives and the world

Our Historical Roots

Sumitomo's history dates back to its founder, Masatomo Sumitomo (1585-1652), who opened a book and medicine shop in Kyoto in the 17th century. Masatomo left his teachings in the form of his "Founders Precepts" in which he explains the points of conducting business. His precepts still serve as the foundation for "Sumitomo's Business Philosophy".

That book and medicine shop evolved into a business empire with the opening of the Besshi Copper Mine in 1691, an operation that led the industry in copper refining, smelting and distribution. The Besshi Copper Mine continued operations for 283 years, forming the backbone of Sumitomo's business which would further branch out to numerous industries, including the trading and investment company, Sumitomo Corporation.

Today, The Founders Precepts remain a constant for our business practices, calling on us to "Not only in matters of business, but all situations, make efforts with deepest gratitude in all aspects," as well as to refine ourselves to develop a trustworthy character rather than just pursuing money-making endeavors.

About Us

We Are Reliable Investors

About Us Industry Focus

ENERGY

From tubular solutions throughout the supply chain to investments in new hydrogen technology, our Energy business is focused on enabling future power resources.

AUTOMOTIVE

A key supplier of steel products for brands like Tesla and an owner of one of the world's largest marketers of tires and automotive services.

SOCIAL INFRASTRUCTURE

Our nearly 40 years as a rail products and railcar supplier has gained us a reputation as a trusted partner and project manager. Our world-class logistics enterprise provides seamless global transport for our customers, suppliers and partners.

AGRI-FOOD & LIFE SCIENCE

As a supplier of various raw materials and food products and provider of the latest technology in crop science, we impact society by solving a paradoxical social agenda in sustainable agriculture. The agricultural world struggles to decarbonize while challenged to boost food production for a constantly growing population, and we help find solutions to help them promote clean farming.

Sumitomo Corporation of America

CONSTRUCTION & TRANSPORTATION SYSTEMS

We provide various solutions through some of the most trusted names we own in the construction and mining equipment business and have operated a thriving aerospace and defense business both in the public and private sector for more than 40 years

REAL ESTATE

We have a long history of being visionary real estate partners and have a diverse portfolio of assets that include master planned community developments to premier commercial, residential and industrial properties.

MINERAL RESOURCES

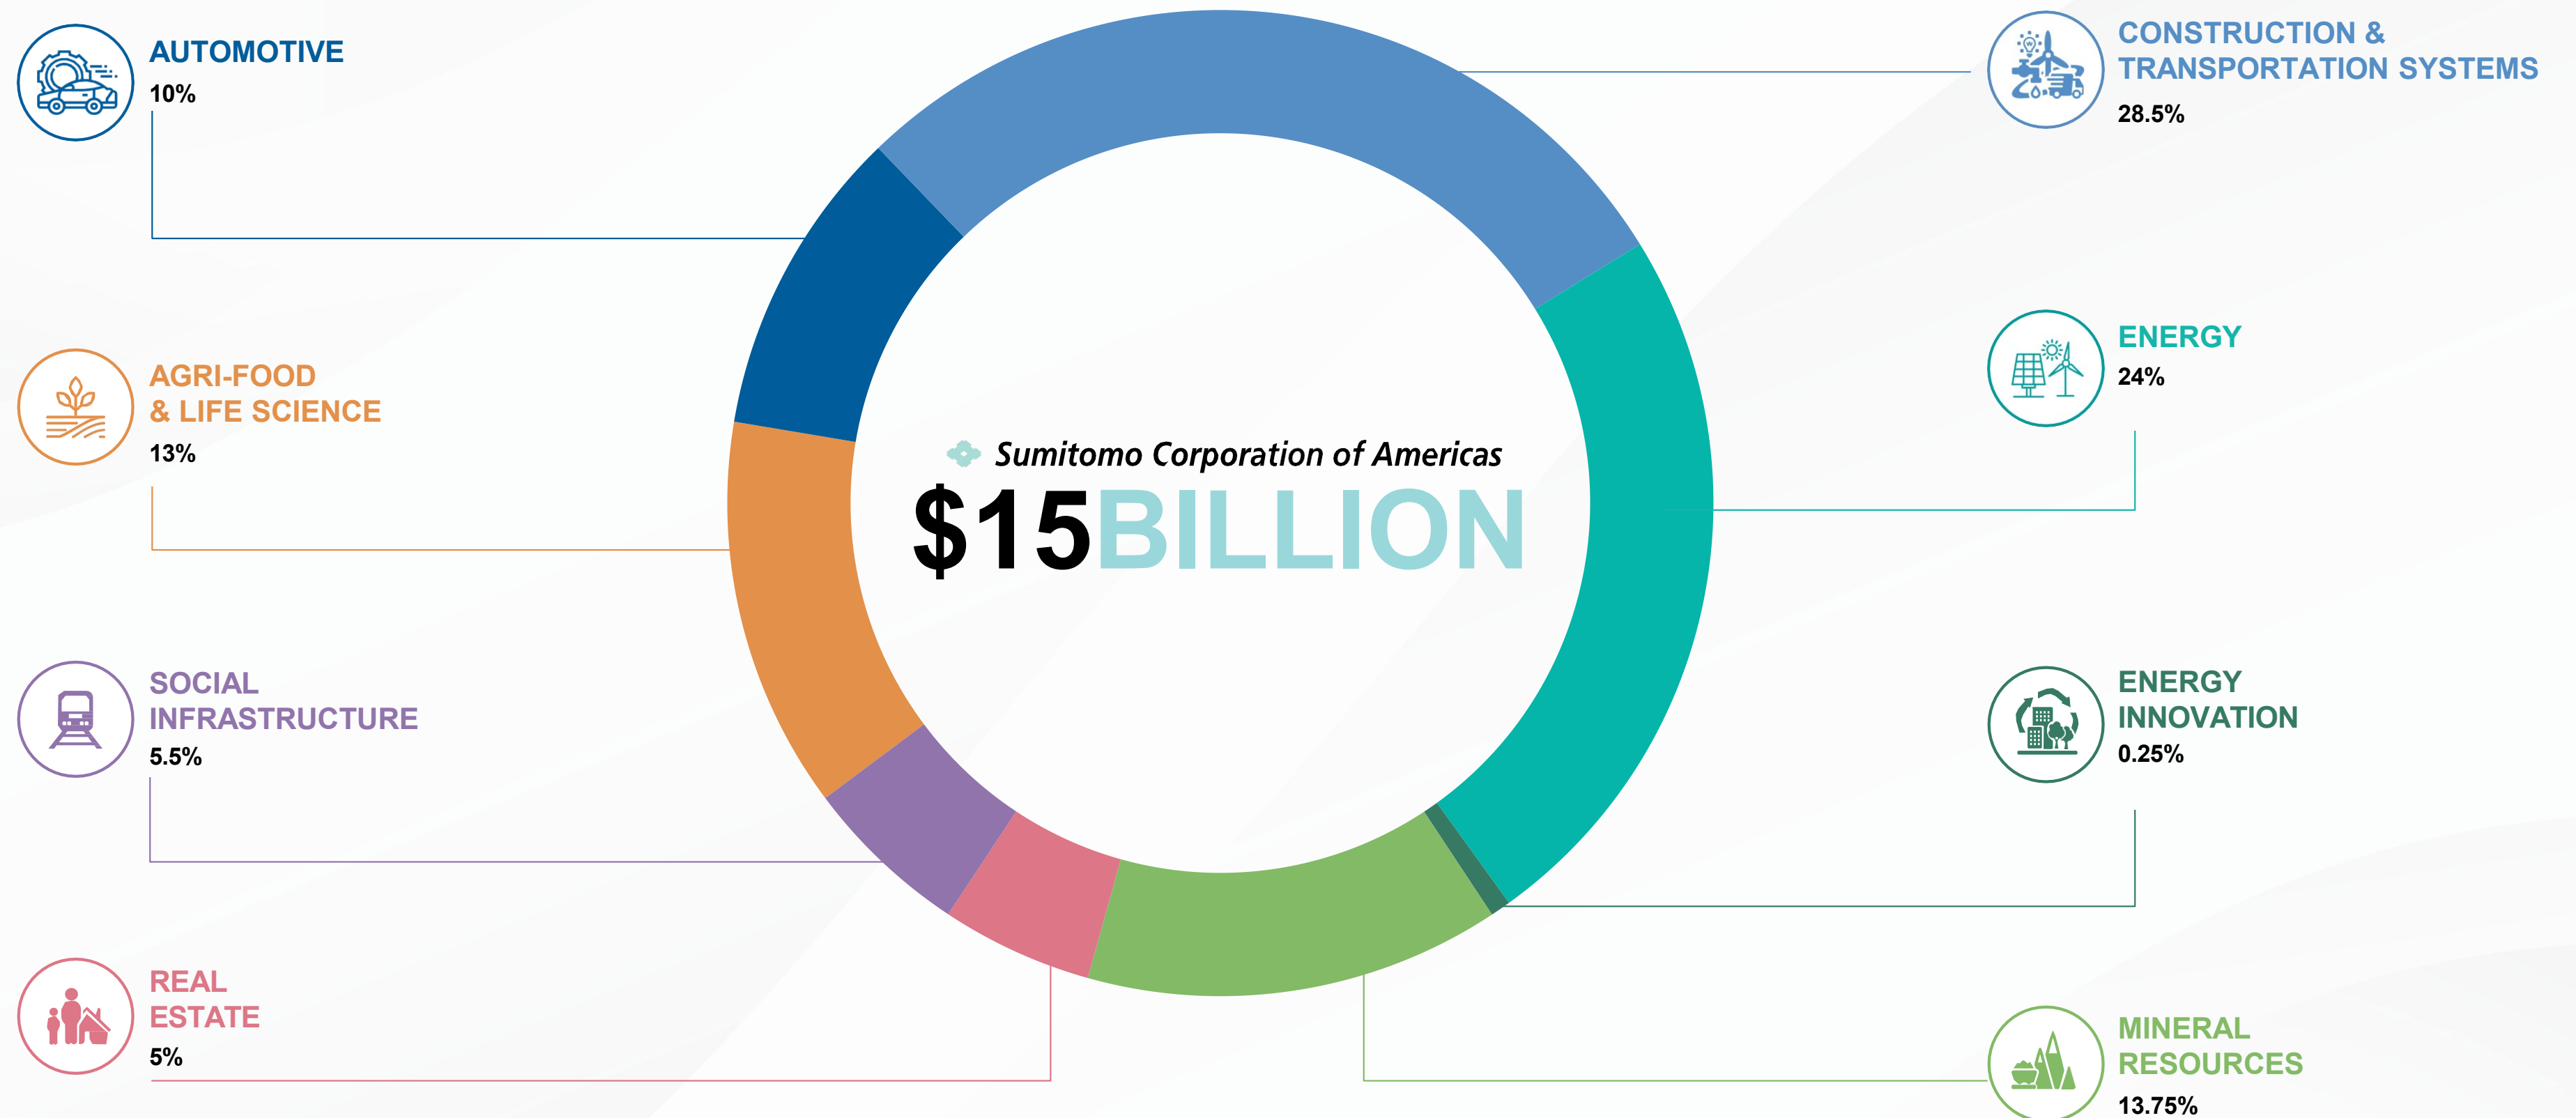

From traditional mining operations throughout the Americas to investments in new mining related technology, we are helping to source solutions that improve the mining process, product and sustainability of this industry.

ENERGY INNOVATION

We are committed to facilitating sustainable new business development through our cross organizational strengths and seek opportunities in the greening of Americas' industries and energy resources.

About Us Industry Focus

We are Solutions Providers

International Trade

We connect suppliers with buyers anywhere in the world.

Investments & Joint Ventures

We can be both Principal and Agent when investing in local business.

Financing

We provide capital infusion when needed.

Logistics Management

We are world-class logistics and supply chain managers.

Technology Transfer

We find opportunities to introduce new technologically-driven and commercially promising products or ideas around the world.

Research & Marketing

We do thorough research and market feasibility studies that help companies enter unfamiliar territories with expert knowledge.

Product Development & Project Management

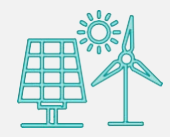

We add value in product development and can coordinate and manage every detail of domestic or international projects, whether a public or private contract.

03

Our Businesses

Supporting society through stable and continuous growth

Energy Business Division

We contribute to the development of local communities and industries with our global value chains for various tubular products, energy projects spanning LNG, renewables, geothermal, and an expansive Sulphuric acid trading business.

Groups under the Division

- Tubular Products Group
- Power Infrastructure Group
- Basic Chemicals Group
- Energy Group

Business Fields:

- Basic Chemicals **
- Natural Gas & LNG
- Energy Equipment & Services *
- Electric Utilities Gas Utilities
- Renewable/Thermal Electricity Generation
- Environmental Commodity

*Approx. 35% share in Oil Country Tubular Goods field

**Approx. 30% share in Sulfuric Acid seaborne import in US

Group Companies and Projects:

Global supply chain management services for energy industries

A distributor of OCTG and upstream products for E&P

A distributor of pipe, valve and fitting for the energy and infrastructure market"

Specializes in high grade alloys for demanding applications.

fITC shifts next to SATCO/ SACIONX, both are Chemical

OCTG supply and operations service provider.

Power supply company with renewable and thermal power plants throughout the U.S.

Soyventis is a global chemical distribution and supply chain company

Imports and distributes sulfuric acid throughout the United States

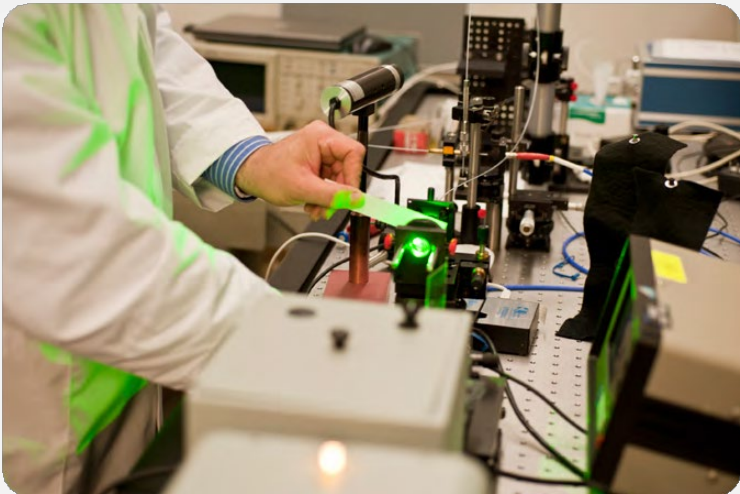

ST Cove Point LLC

<PSE>
Natural Gas/LNG/Power/Environmental Products Trading
<ST Cove Point LLC>
Export LNG from the Cove Point Terminal in Maryland, USA to Japan and around the world

Automotive Business Division

The Automotive Group operates a wide range of businesses in the automotive sector, from manufacturing to distribution and financial services for automobiles, automotive components, motorcycles, and tires, while focusing on the next-generation mobility society with a bird’s eye view of the industry value chain. We strive to promote sustainable mobility society through businesses that contribute to climate change mitigation and creation of circular economy.

Groups under the Division

- Metal Products Group
- Automotive Group
- Electronics Group

Business Fields:

- Automobiles *
- Automobile Components **
- Semiconductors & Semiconductors Equipment

*Approx. 20% share in Automotive Manufacturing & Engineering Sector

**Approx. 15% share in U.S. Tire Distribution Sector

Group Companies and Projects:

ACM is a global automotive leader and environmentally friendly supplier of automotive brake rotors.

Shelbyville, Indiana
Specializes in production for prototype and small lot castings.

Querétaro, Mexico
Procures steel sheet and coil materials from major steelmakers worldwide to cut

Murfreesburg, TN
A leading flat rolled metals processor/distributor producing specialized metal products.

TBC Corporation is one of the largest marketers of tires for the automotive replacement market

Social Infrastructure Division

The Social Infrastructure Division is focused on creating reliable and sustainable transport and city development solutions for communities across the Americas region. From a world-class logistics enterprise to commuter rail and utility operations, we are committed to making the world around you more convenient and efficient.

Groups under the Division

- Infrastructure Metal Products Group
- Social Infrastructure Group
- Logistics Group

Business Fields:

- Infrastructure Metal Equipment & Services
- Air Freight & Logistics
- Marine Transportation
- Transportation Infrastructure*
- Ground Transportation
- Water Utilities

*Approx. 25% share in Automated People Mover (APM) field

Group Companies and Projects:

ASA is a provider of products to a number of businesses and is the leading producer of railroad

One of the largest water supply companies in Brazil.

Operation and maintenance provider for the Crystal Mover Automated People Mover systems manufactured by Mitsubishi Heavy Industries America and installed throughout

Leading supplier of forged crankshafts to the automotive market in North America

A leading manufacturer of forged steel wheels and axles for freight railcars, locomotives and passenger railcars.

Sumisho Global Logistics is a full-service global transportation company licensed with the Federal Maritime Commission as an Ocean Transportation

Agri-food & Life Science Division

The Agri-food and Life Science Division is building upon its global sales network and supply chains in the Americas in cooperation with diverse partners. Its businesses contribute to the stable supply of foodstuffs and the sustainable development of agriculture through its businesses in agricultural inputs. On the personal care side, we engage in the trade and distribution of raw materials for our cosmetics business as well as for our animal health business.

Groups under the Division

- Food & Lifestyle Group
- Life Science Group

Business Fields:

- Food Products *
- Chemicals
- Pharmaceuticals
- Personal Care Products
- Pet Care Products
- Agricultural Input Products

*Approx. 15% share in North American mushroom

Group Companies and Projects:

 <p>Found in 1983, Agro Amazonia is one of the largest Agricultural & livestock input retailers group in Brazil. HQ is in Cuiaba, Mato Grosso and sales network covers 10 states in the area of mid-west part of Brazil. In 2022, Agro Amazonia acquired Nativa, which is the retailers in Minas Gerais with fertilizer factory.</p>	 <p>Cosmotec is specialized in providing innovative ingredients to the cosmetic market in Brazil.</p>	 <p>Cyns is a leading producer of insects for the Brazilian animal nutrition market.</p>
 <p>Leader in the long steel segment in the Americas; main supplier of specialty steel and the largest supplier of this segment for the automotive industry in the world.</p>	 <p>Founded in 1961, Highline is one of the largest growers of fresh mushrooms in North America, which is a certified organic grower of mushrooms. HQ is in Leamington, Ontario and shipping to Canada, the United States and Japan.</p>	 <p>For more than 90 years, Hartz has been solely focused on delivering exceptional pet care products for consumers in U.S., and now expanded to Canada and Mexico.</p>
 <p>IHARA BRAS is Agrochemical producer and distributor in Brazil and the Joint Ventures with several Japanese agrochemical companies, accumulating Japanese quality & know-how.</p>	 <p>Founded in 2002, Bio Nativa is a biotechnology company dedicated to the development, production and marketing of biological agricultural inputs.</p>	 <p>Presperse is delivering value to the global personal care industry mainly in US through innovation and operational excellence</p>
 <p>For over 30 years, SCOA Meat Dept. has been engaged in pork trading business. Focusing on the specialty products such as 'Silky Pork' for the comfortable lifestyle of consumers.</p>	 <p>Summit Agro USA, Summit Agro Mexico, and Summit Agro South America (Argentina, Paraguay, Chile, Peru, Ecuador, Colombia) are the agrochemical distributors. This group is handling Japanese and non-Japanese plant protection products in Americas, providing farmers with plant protection solution.</p>	

Construction & Transportation Systems Division

The Transportation & Construction Systems Group is engaged in businesses dealing with aerospace projects and leasing, and construction equipment management and rental (including mining and industrial equipment). We evolve our business in response to the trends of the times, contributing to the improvement of social infrastructure and the establishment of a circular economy.

Groups under the Division

- Construction Equipment Solution Group
- Aerospace & Defense Group

Business Fields:

- Construction & Engineering
- Machinery
- Aerospace & Defense

Group Companies and Projects:

 ASAS Distribution of defense products for Japanese defense market	 Hamilton Sundstrand A United Technologies Company Spacesuits & Life support products	 HawkEye³⁶⁰ RF signal satellite constellation
 Infleqtion Infleqtion Processing & Sensing Hardware	 OneSky Unmanned traffic management	 SPINLAUNCH SpinLaunch is an innovative new space technology company that has created an alternative method for putting 200 kilogram class satellites into low earth orbit.
 SUNSTATE Equipment Co. Rental equipment provider for 100 locations across the U.S.	 SMS EQUIPMENT Komatsu dealer for 42 locations across Canada and Alaska	 LINDER Your Business Partner Komatsu dealer for 19 locations across Florida and the Carolinas.
 SINTAVIA Metal additive manufacturing	 WERNERAERO Trading USM /Used Serviceable Materials	

Real Estate Division

Through our Real Estate Division, we support communities through the development of commercial, residential and multi-family properties.

In addition, we’ve broadened our business focus to support the growing demand for industrial parks and warehouses.

Departments Under Division

- Commercial Real Estate Dept.
- Real Estate Fund Dept.
- Investment Management Dept.
- Business Development Dept.
- Materials &Supplies Dept.

Commercial Office Buildings

In 1981, SCOA began its real estate activities in commercial real estate, with the acquisition of Central Pacific Bank and Kaimuki Plaza in Honolulu, followed by 600 Third Avenue in New York City (sold in 2004). Throughout the years, SCOA has been an active investor in the commercial market, acquiring and selling properties in New York, San Francisco, Washington D.C., Los Angeles, Phoenix, Tempe, Minneapolis and Miami. SCOA’s current office building investments include 203 N. LaSalle in Chicago, SPS Tower in Minneapolis, and 201 E. Washington in Phoenix.

SCOA Real Estate Partners is a subsidiary of Sumitomo Corporation of Americas. Established in 2023 and based in Atlanta, GA, SREP targets its investments into development of following 3 types of business.

Business Fields:

- Real Estate Management & Development
- Multi-family Development
- Master Planned Communities
- Industrial Developments
- Commercial Office Buildings

1. Multi-family Developments

SCOA entered the rental apartment market in 1988, when, along with the company’s development partners, they constructed a 20-story apartment complex in Virginia. Since then, SCOA has invested in apartment projects in Houston, Phoenix, Denver, and Atlanta, in excess of 3,200 rental units.

2. Master Planned Communities

Starting with Atlanta’s Medlock Bridge in 1990, SCOA has been involved in the acquisition, development and sales of both single-family homes and several master planned communities, as sole owners and in partnerships with local developers. These include communities that are regarded as some of the finest in the US, with key successes including Hamilton Mill in Atlanta and Towne Lake in Houston. We work in joint-venture partnerships with other developers

3. Industrial Developments

We are diversifying our U.S. real estate portfolio and investing in industrial development projects as the industrial/logistics market has been the most sought-after property sector in commercial real estate for more than 5 years now. The demand fundamentals are strong from the growing trends of globalization and e-commerce/online shopping especially after the global pandemic since 2020. A two Texas property and a Chicago property are currently under development.

Mineral Resources Division

The Mineral Resources Division engaged in various businesses throughout this industry. We hold interests in the production of copper, zinc, silver, aluminum and iron ore. We also operate a trading business that offers extensive functions, including realizing synergies between trading and operating assets and using commodity derivatives.

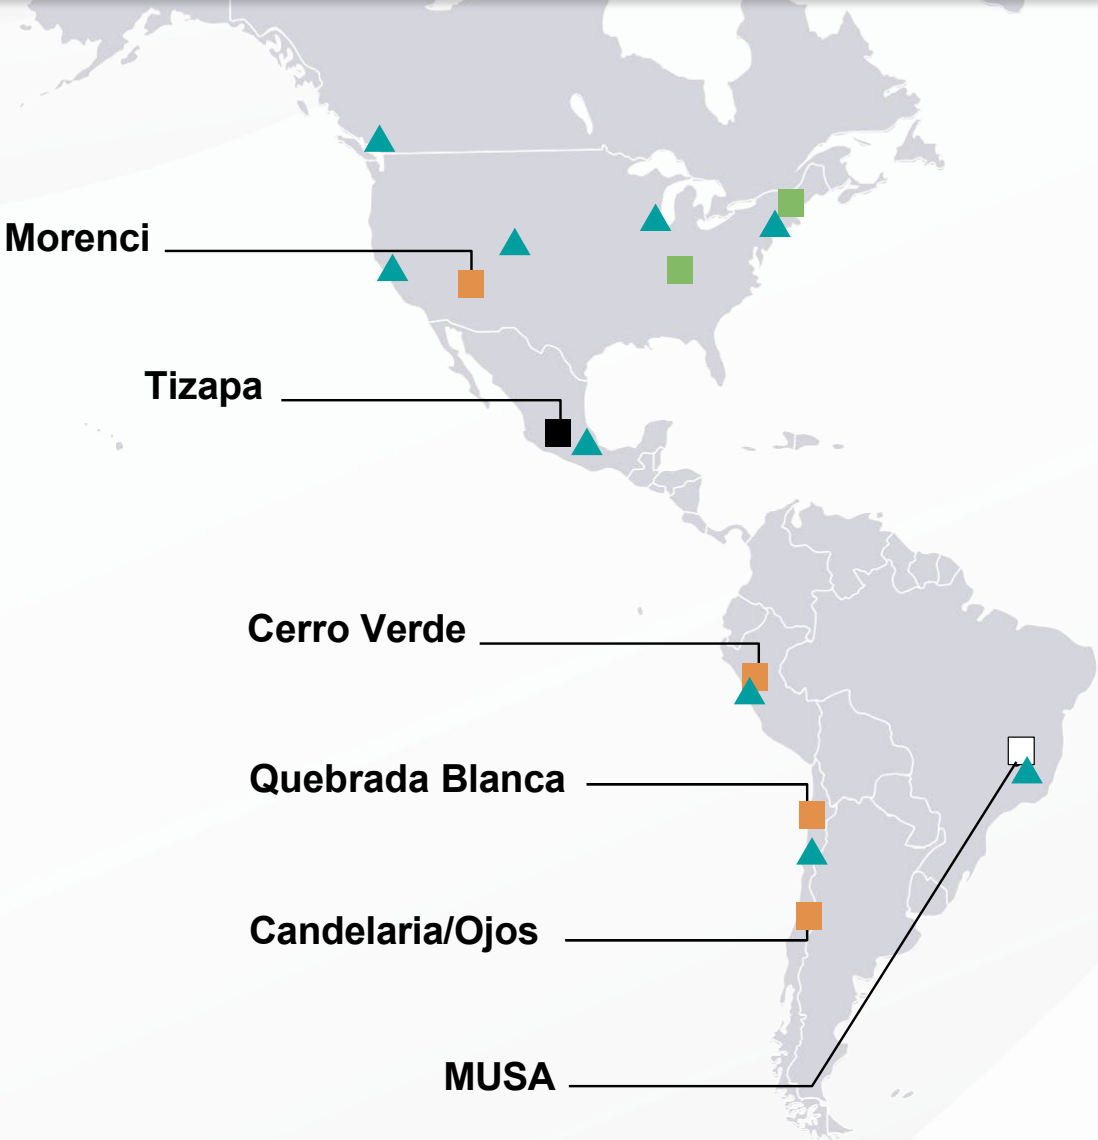

Business Fields:

Mineral Resources

Carbon & Steel Raw Materials

Commodity Business

Light Metals

Mineral Resources

Through our business, we produce several mineral commodities in the Americas and also provide services for miners, smelters and metal consumers through trading and new technologies.

Our mining operations include:

- Morenci: Copper mine in the US. JV with Freeport McMoRan (Freeport) & Sumitomo Metal Mining SP (SMM).
- Cerro Verde: Copper mine in Peru. JV with Freeport, Buenaventura & SMM.
- Quebrada Blanca: Copper mine in Chile. JV with Teck, SMM & ENAMI.
- Candelaria/Ojos: Copper mine in Chile. JV with Lundin Mining & SMM.
- MUSA: Iron ore mine in Brazil. JV with Usiminas
- Tizapa: Zinc/Silver mine in Mexico, JV with Penoles and Dow.

Carbon & Steel Raw Materials Business

We offer a complete range of carbon products and battery raw materials including Lithium Carbonate, Nickel and Cobalt for Steel /Aluminum / Battery value chains.

Commodity Business

SCMI US is a commodity trading company that is focused on growing our interests in the US. We offer spot and forward physical trading, leases, consignments and financing, physically settled derivatives and other structures, upon client's request.

Light Metals

We are an active player across the aluminum value chain through our group companies like Tri-Arrows Aluminum, a leading supplier of rolled aluminum sheet in the North American Market focusing on the Beverage Can Sheet and Automotive Sheet markets. Additionally, we contribute to the Aerospace industry by supplying Titanium sponges.

Energy Innovation Initiative Americas

The Energy Innovation Initiative - Americas (EII-A) is focused on developing decarbonization or clean energy projects to support the energy transition in the Americas region. EII-A will accelerate business development into next-generation energy fields while leveraging our global network and trading expertise to further the development of natural gas, LNG, and others on a global scale.

Departments Under the Initiative:

- Biomass Energy
- Biomass Materials & Wood Resources
- Hydrogen Energy
- Energy Service
- CCS/CCUS

Business Fields:

- Carbon Free Energy (Biomass Energy, Hydrogen, Ammonia etc.)
- Power & Energy Service (Distributed Solar IPP, Virtual Power Plant etc.)
- Carbon Management (CCS*/CCUS**, Carbon Credit, Forest management etc.)

*CCS: Carbon Capture & Sequestration

**CCUS: Carbon Capture Utilization & Sequestration

Group Companies and Projects:

Technology Company developing DAC (direct air capture)? *invested through Presidio Ventures

Hydrogen production and distribution company

Joint venture with Raizen, producing pellet from bagasse.

RETI is a Canadian private development company focused on low carbon energy transition projects in partnership with Indigenous nations and industry.

Strategic Biofuels is developing a series of deeply negative carbon footprint plants that convert forestry waste from responsibly managed and sustainable plantation forests into clean-burning renewable transportation fuels.

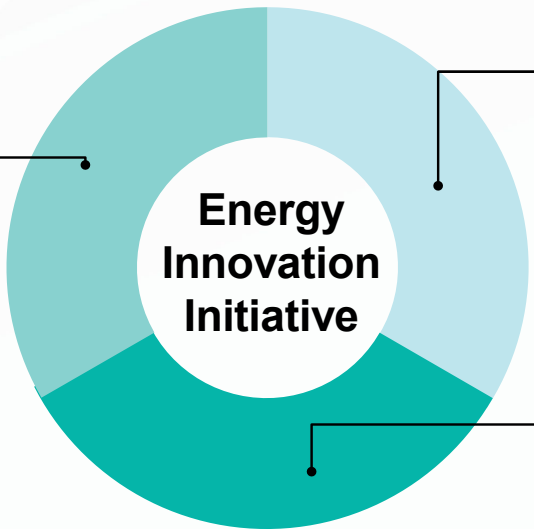

Technology company developing a innovative photocatalytic reactor

Technology Company developing nuclear fusion power

Carbon Management Business

- Metanation (Carbon Recycle)
- Forest development, CCUS, Emission Trading, etc

Carbon-Free Energy Development (large value chain model)

- Hydrogen Large Scale Value Chain Development
- Carbon-Free Hydrogen Ammonia Business
- Next Generation Bio Energy

New Power & Energy Service Development (distributed model)

- Large Scale / Reused Battery Business
- Green Electricity Platform Business
- Zero Emission Combined Energy Service Business
