

Project Overview

1. Project specifications

Name	Noshiro-Mitane-Oga Offshore Wind Power Project
Engines/turbines	Offshore wind turbines (bottom-mounted)
Output	Up to 480,000kW
Location	Offshore near the cities of Noshiro, Mitane and Oga in Akita Prefecture
Start of operation	2026 (tentative)

2. Envisioned project area

Source: "Digital National Land Information (Administrative Areas)" (as of March 2020; Ministry of Land, Infrastructure, Transport and Tourism website)

The black-bordered area is the designated project implementation area, within which the gray area (water depth: 10m-30m) denotes the wind power generator installation zone.

- ◇ Designated project implementation area
 - Offshore area near Noshiro, Mitane, and Oga in Akita Prefecture
 - Area: approx. 59km²
- ◇ Conditions in designated project implementation area
 - ① Water depth of 30m or less
 - ② No port/harbor zones
 - ③ Yearly average wind speed of 7.0m/s or greater
 - ④ No fixed/demarcated fishery right zones
 - ⑤ Landward side of trawl fishery ban line
 - ⑥ No fish reefs/seaweed beds
 - ⑦ Beyond 5km perimeter of natural parks
 - ⑧ No vessel traffic distribution areas
