Overview of the Company

PT Sumitomo Indonesia, headquartered in Jakarta, is a key subsidiary of Sumitomo Corporation Japan, operating as a merchant wholesaler across various industrial sectors. The company is part of the global Sumitomo Corporation Group, which spans over 65 countries and includes more than 800 group companies.

Established in 1999 and headquartered in Jakarta, PT Sumitomo Indonesia represents Sumitomo Corporation in the Indonesian market and its development. Sumitomo's contribution to Indonesia's market growth and development, however, began as early as 1953.

Today, PT Sumitomo Indonesia continues to build on more than seven decades of collaboration and contribution to Indonesia's development, managing diverse businesses and delivering high-value goods and services to domestic and international customers.

PT Sumitomo Indonesia is involved in:

- Trading and distribution of industrial goods.
- Strategic partnerships with local and international firms.
- Infrastructure and real estate development projects.
- Support for digital and media ventures.

Corporate Mission Statement

Corporate Vision

“ We aim to be a global organization that constantly stays a step ahead in dealing with change, creates new value, and contributes broadly to society. ”

Management Principles

- To achieve prosperity and realize dreams through sound business activities.
- To place prime importance on integrity and sound management with utmost respect for the individual.
- To foster a corporate culture full of vitality and conducive to innovation.

Activity Guidelines

- To act with honesty and sincerity on the basis of Sumitomo's business philosophy and in keeping with the Management Principles.
- To comply with laws and regulations while maintaining the highest ethical standards.
- To set high value on transparency and openness.
- To attach great importance to protecting the global environment.
- To contribute to society as a good corporate citizen.
- To achieve teamwork and integrated corporate strength through active communication.
- To set clear objectives and achieve them with enthusiasm.

Message from President Director

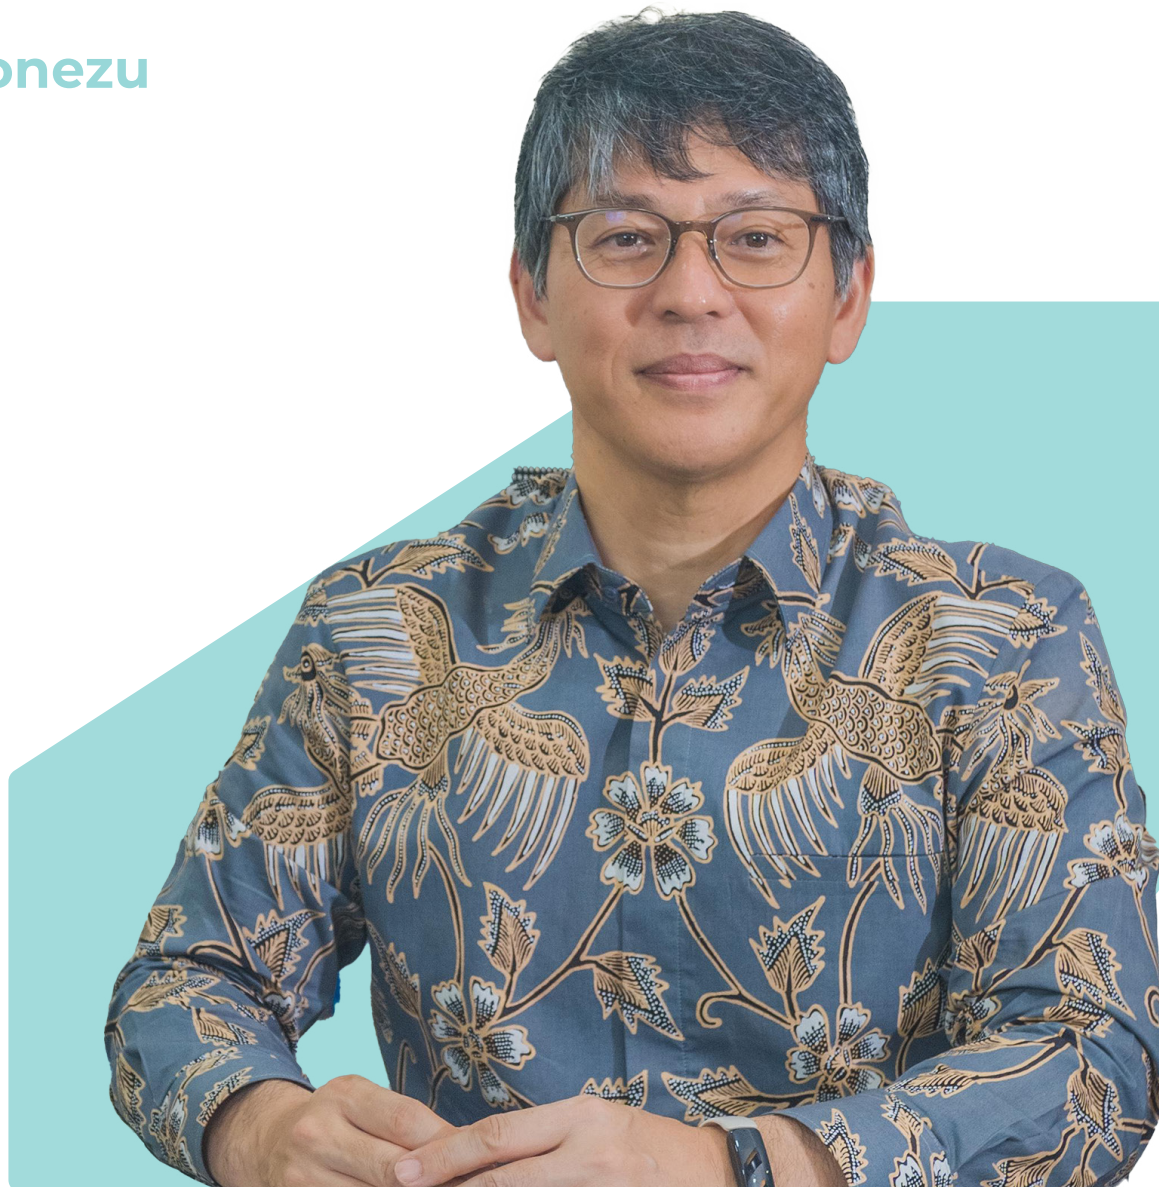

Our journey has been one of innovation, integrity, and commitment, always considering our people as our most precious partners and assets. We have grown together with Indonesia, embracing new values and sustainable development, which has been the cornerstone of our success.

As we navigate through the challenges of a rapidly changing world, our dedication to the Sumitomo business philosophy remains unwavering. This philosophy has been our legacy for hundreds of years and forms the foundation of our sustainable development. We are committed to addressing the unprecedented challenges facing our world by adhering to our corporate mission and core values, which have guided us for many years.

Our commitment to ESG (Environmental, Social, and Governance) and SDG (Sustainable Development Goals) is stronger than ever. We believe that through our adherence to these principles, we can create significant achievements that not only benefit our company but also contribute positively to society.

Nobuyasu Yonezu

President Director

Business Unit Management System

Business Unit Management System

Business operations of PT Sumitomo Indonesia are organized under eight business units involving Steel Products; Automotive; Construction Equipment; Diverse Urban Development; Media & Digital; Coal & Mineral Resources; Chemicals; and Business Development.

This organization system leads PT Sumitomo Indonesia to integrate people with different and high quality competencies, background and experience in order to develop innovative outcomes for both products and services. PT Sumitomo Indonesia called this organization system with "Business Unit Management System". Along with the eight business units, there are corporate units which role is to support the business units' smooth operations.

● BUSINESS FIELDS

Steel Products

Steel Sheet and Coil | Construction Steel | Mechanical Tube
Tubular Products | Railway Products | Speciality Steel (Bar & Wire)

Steel Sheet and Coil

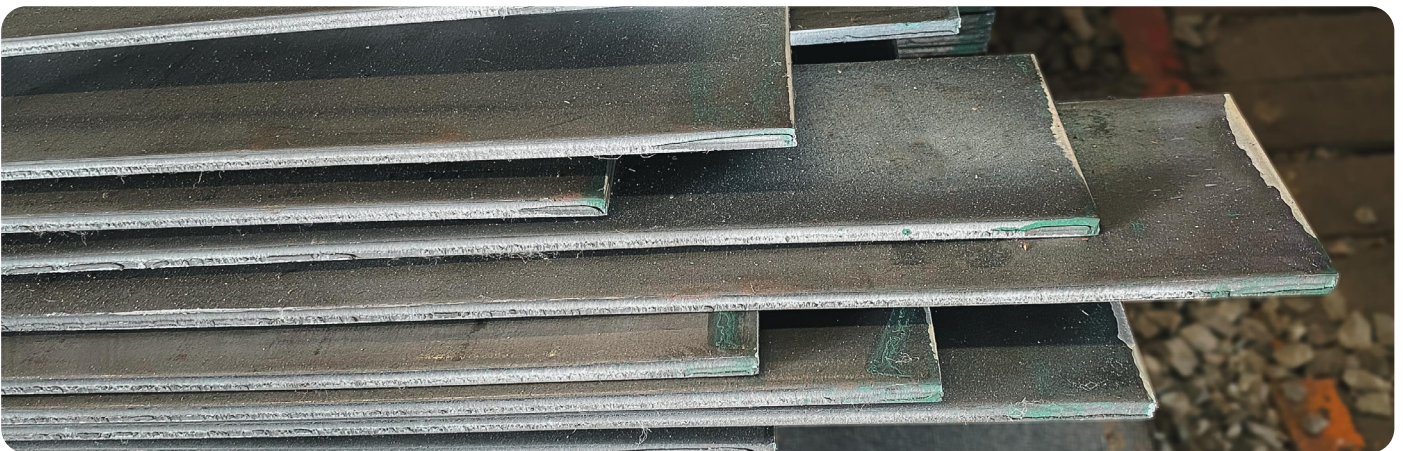

PT Sumitomo Indonesia has been involved in trading of various steel and coil products in Indonesia for many years.

Our expertise includes supply of Hot Rolled Steel Sheet / in Coil (HRC), Cold Rolled Steel Sheet / in Coil (CRC), and Coated Steel Materials from various sources including Japan, China, Taiwan, Vietnam.

However, in recent years, we also working with various domestic steel mills in Indonesia to support local demand.

Construction Steel

The plate & construction steel department is aiming to achieve customer's ultimate satisfaction by providing high quality materials, reasonable price, top-notch service, to prove our excellence in this business.

Heavy Equipment and Machineries Material

Iron, Coal, Gold, Copper, etc are products of mining companies. As the products are key to every aspect in our life, mining industry is involved large scale of investment, skill, experience and equipment.

PT Sumitomo Indonesia has a significant experience in providing excellent materials for heavy equipment in Indonesia, which supports mining companies business and operation in Indonesia and overseas. PT Sumitomo Indonesia is prominent in heavy machineries and equipment industries, because of the outstanding service and quality.

High Tensile Steel Plate

We provide material of High Tensile Steel Plate in range of 540-950 N/mm². The application is **construction structures, pressure vessels, oil storage tanks, bridges & heavy equipment structures, etc.**

The products are proven to be excellent among heavy equipment companies.

Abrasion Resistant Steel Plate

PT Sumitomo Indonesia provides Abrasion Resistant material from biggest Mill in Japan at 400,450,500 and 600 Brinell hardness, and they are able to be used in extremely low temperature up to -40°C.

The material has been used in major heavy equipment, mining, and cement industries with satisfactory result. The application is dump body, bucket, chute, etc.

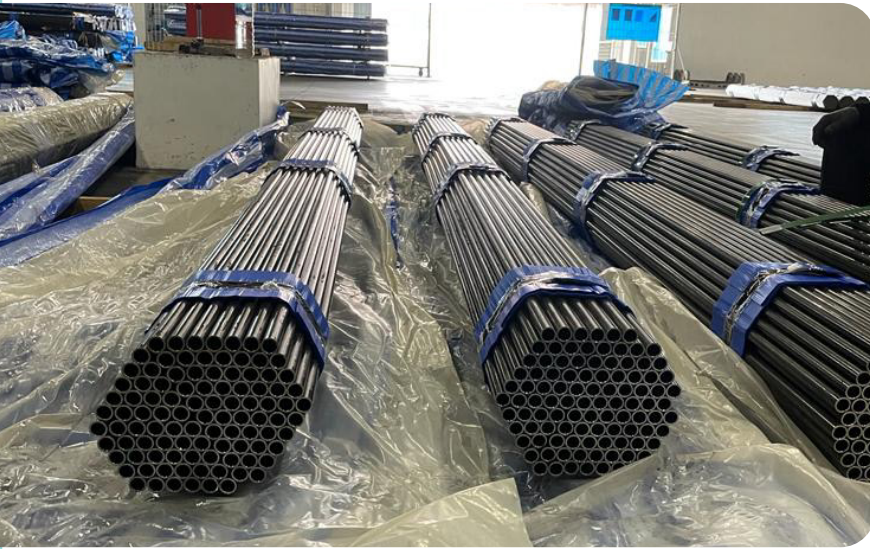

Speciality Steel (Bar & Wire)

PT Sumitomo Indonesia delivers a wide range of specialty steel in the form of steel round bar (carbon and alloyed) and steel wire (CHQ, Low Carbon and High Carbon) with the main suppliers from Japan, Korea, Taiwan, China and India. The main customers for the specialty steel mostly are Japanese OEM automotive makers and vendors.

Mechanical Tube

PT Sumitomo Indonesia delivers high quality mechanical tube products for the local automotive industry (two- and four-wheels).

Our mechanical tube products ranges from ERW (Electric Resistance Welding), Cold Drawn Tube, Seamless with Round or Square shape. Our products only used high quality materials to meet automotive industries requirement especially for the safety components. PT Sumitomo Indonesia also strives to find the best supplier that meets customer requirements in Quality, Cost, and Delivery.

Tubular Products

The primary focus of the Tubular Products Division is on supplying a wide range tubular products including line pipe and specialty tubulars to the oil, gas, petrochemical, refinery plant and boiler and heat exchanger fabricators.

Sumitomo Indonesia Tubular Products Division is committed to become a Total Solution Provider of the highest quality tubular products and services that meets customer's demands. We create a comprehensive system that provides door-to-door service from manufacturer to customer with the aim of maximizing customer satisfaction. PT Sumitomo Indonesia Tubular Products Division is fully supported by Sumitomo Corporation Tubular Group. With our long experience and complete logistic facilities, we are ready to obtain any opportunities available in this region.

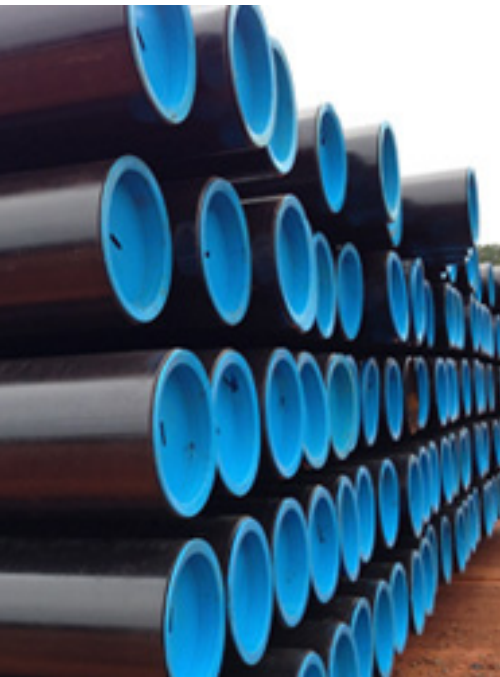

Line Pipe

PT Sumitomo Indonesia works through Tubular Products Division to supply various line pipe products such as seamless pipes (SMLS), Electric Resistance Welded (HF-ERW) pipes and Submerged Arc Welding (SAW) pipes. Most of our line pipe products are manufactured in Japan using leading technology with years of research and experience.

The line pipe department also supplies structural steel tubular through regional stock inventory program for Engineering Procurement Installation and construction contractors (EPIC).

We also provide coating services using first class coating contractors to meet customer's requirement.

Speciality Tubular

The Tubular Products Division also supplies a wide range of specialty tubulars in various grades such as stainless, duplex and high alloy content, which are all manufactured in Japan to ensure the best product quality. Our specialty tubular products have been used by engineering companies, boiler and heat exchanger fabricators and heavy-equipment manufacturers including major oil and gas companies' petrochemical plants.

Railway Products

Rollingstock Parts

We supply high-quality wheels for Diesel locomotives, EMU, freight cars, and passenger cars. Our products ensure reliable and safe transportation across the country, with our wheels and axles meeting internationally recognized standards such as AAR or JIS. With years of industry expertise, we are committed to delivering robust solutions and excellent customer service.

STRATEGIC PARTNER

PT Sumisho Global Logistics Indonesia

PT Sumisho Global Logistics Indonesia is a company engaged in field of logistic services which having international standards, environmentally sound, and customers satisfaction oriented.

As an integrated global logistics service provider, the company covers international forwarding, warehousing, transportation, wholesales trading, customs clearance, delivery, and distribution center operations in Indonesia, where logistics services are dramatically increasing. Since its establishment in 1994, the company has expanded and enhanced its distribution centers in response to Indonesia's strong growth.

PT Sumisho Global Logistics Indonesia transports products and parts manufactured in industrial parks and other locations in Jakarta. As an integrated global logistics service provider covering logistics center operations to customs clearance for import and export, it plays a crucial role in Indonesia's transportation industry that has been traditionally dominated by individual business owners. Particularly after the recovery from the Lehman failure, the company has been receiving a great number of inquiries due to its readiness as a general logistics company.

The company is carrying out the "milk run" distribution operation for auto manufacturers while responding flexibly to daily traffic jams. Milk run is a "round trip" logistics system that facilitates both collection and distribution. PT Sumisho Global Logistics Indonesia continuously monitors its trucks, which are equipped with a global positioning system (GPS), by using location management monitors, as they pick up parts from suppliers and deliver them to auto manufacturers around the clock. This system allows the company to deliver parts just in time.

Auto manufacturers need tens of thousands of parts to make even one vehicle, but many of them carry stocks for only several-hours' worth of auto production. Therefore, the milk run delivery system plays the role of the unsung hero who works behind the scenes to support the increasing car demands in Indonesia.

STRATEGIC PARTNER

PT. Super Steel Karawang

Established in 1998 as the only bonded coil center in Indonesia, the company has two plants; the Cikarang Plant that mainly focuses on customers related to cars for the domestic market, and the Karawang Plant that mainly focuses on customers dealing in re-export.

The plant cuts steel coils as raw materials into required sizes for customers to press. The plant is enhancing its facilities to meet demand, in particular, the demand for booming car-related industries. PT Super Steel Karawang is quickly building a new factory, which will house the company's second blanking press (a facility to press steel for automobiles), next to its Karawang Plant.

By taking advantage of two pillars, Indonesia's domestic demands, particularly from car-related industries, and re-export from Indonesia to the world, PT Super Steel Karawang will continue to contribute to a stable supply of high quality products.

SERVICE

Just In Time

PT Sumitomo Indonesia understands that every business is unique. Therefore, we offer Just in Time (JIT) service to improve our support and services to customers' business operation and needs.

Just In Time service is business scheme of tailored design operation to provide an integrated solution of supply management for the customer. The purpose of JIT business scheme is to assist customers in their purchase and logistic activities so that the customer may focuses their resources on their core and added value activities.

SERVICE

Export/Import

PT Sumitomo Indonesia is known for their excellent service on importing steel related materials.

PT Sumitomo Indonesia holds not only API-U but also all other license required to import various type of steel materials. For some steel material, we also have good source and capability to import SNI mandatory materials from the approved steel mill. As an extra value, we established branch office in Batam to expose and expand our business more to the steel related industries.

Armed with the importation experience and reliable supply, we offer services to effectively synchronize together with the customer resources and business nature to manage the best business activities that will create additional values to the business.

In the past few years, PT Sumitomo Indonesia has also started exporting business for steel material. Utilizing our global network, we strive to assist local steel producer to find new opportunity outside Indonesia boundary.

PT Sumitomo Indonesia also provides global logistics services such as international forwarding, warehousing, and transportation through our group company, PT Sumisho Global Logistics Indonesia.

Automotive

Sumitomo Corporation (SC) Group has played a pivotal role in driving the growth of Indonesia's automotive industry for decades, offering comprehensive services from manufacturing and trading automotive parts to financial solutions for end users. Our diverse range of businesses supports the entire automotive value chain, ensuring high-quality components, efficient supply chain management, and accessible financing options. The SC Group remains committed to delivering excellence, reliability, and innovation to meet the evolving demands of the industry.

Manufacturing of Automobile Parts

Since 1998, the SC Group has specialized in the casting and machining of iron products for the automobile industry. We manufacture high-quality components such as brake drums and disks, catering primarily to local original equipment manufacturers (OEMs) in Indonesia. Our expertise and commitment to excellence ensure that our products meet the rigorous standards required by the automotive sector.

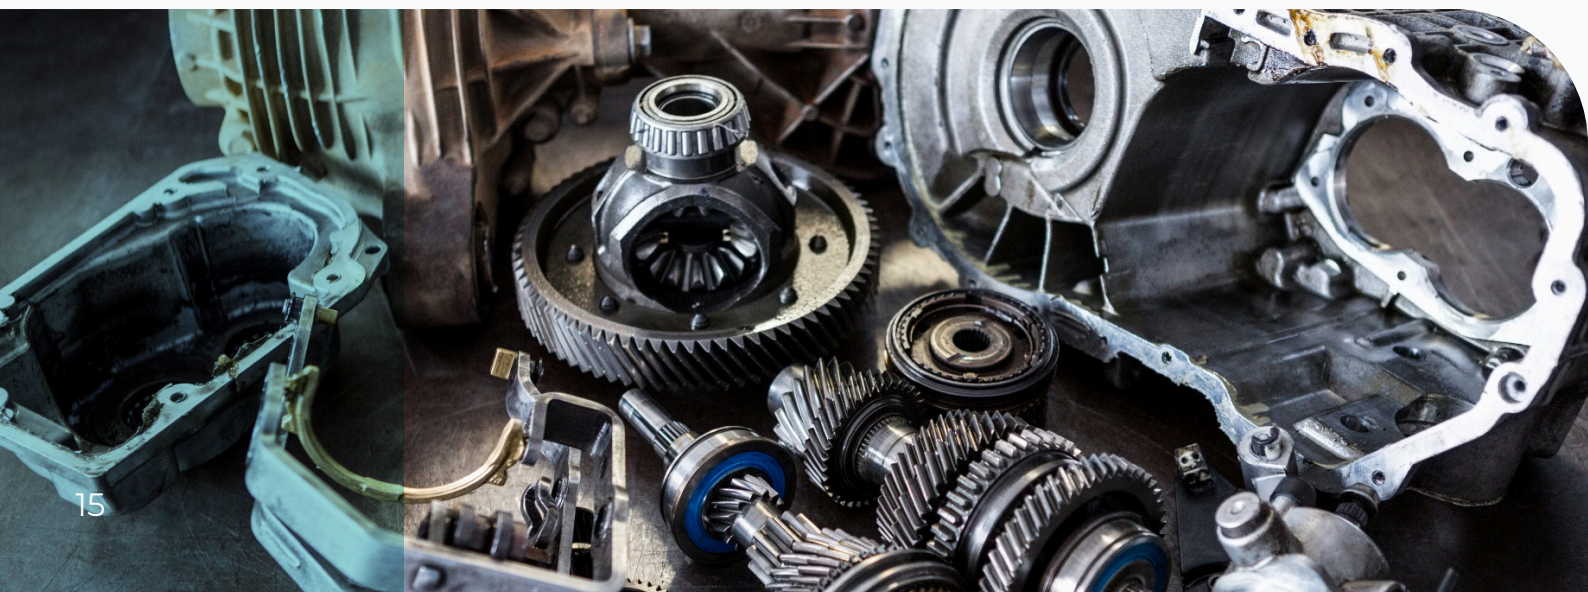

In addition to serving the domestic market, we also export our products to international markets. This global reach allows us to showcase the quality and reliability of our iron castings and machined parts on a broader scale. By continuously improving our manufacturing processes and adopting advanced technologies, we strive to maintain our competitive edge and support the evolving needs of the automobile industry both locally and abroad.

PT ASAMA INDONESIA MANUFACTURING

KIRIU

PT KIRIU INDONESIA

Entire Supply Chain Management of Automobile parts

The SC Group has been actively involved in the import and export of automotive parts for car manufacturers. Our extensive experience in this field ensures that we source the highest quality components from around the world, meeting the diverse needs of our clients. By leveraging our global network, PT Sumitomo Indonesia can navigate complex international markets, securing the best deals and ensuring timely delivery of essential parts to our manufacturing partners.

In addition to this, with the aid of our affiliated company, we offer comprehensive logistics coordination services. This includes managing procurement, overseeing shipment and import processes, maintaining stock control, and ensuring Just-In-Time delivery. Our dedicated logistics team works around the clock to monitor and streamline these processes, reducing lead times and minimizing disruptions. These integrated services are designed to enhance operational efficiency and reliability, providing our customers with a seamless and dependable supply chain solution that supports their production schedules and business growth.

Sales and Financial services of Commercial Trucks

Sumitomo Corporation Group, in partnership with Hino Motors Group, sells commercial trucks and provides financial services to customers. Our collaboration has enabled us to leverage Hino's expertise in manufacturing high-quality commercial vehicles, ensuring that our clients receive top-notch products. Additionally, our comprehensive financial services are designed to make the purchasing process seamless and accessible, supporting businesses in acquiring the necessary transportation solutions. By combining our strengths, we continue to enhance our customer experience and drive success in the commercial trucking industry.

PT HINO MOTOR SALES INDONESIA

PT HINO FINANCE INDONESIA

Vehicle rental services for corporate users

In 2023 SC group established short and long-term vehicle rental and fleet management service company in Indonesia by name of PT. SMAS Mobility Indonesia, to support rising demand of corporate cars by Japanese and other global companies.

PT SMAS MOBILITY INDONESIA

B to C Finance service for Automobile and Motorcycle

SC group provides automobile and motorcycle finance through OTO Group, one of the leading finance companies in Indonesia with more than 20 years of experience in consumer financing. OTO Group provide car ownership financing, both new and used cars and motorcycles. OTO Group also provides lease financing based on customer's request. The main targets of the company are individual consumers, in addition to business entities.

OTOgroup

● BUSINESS FIELDS

Construction Equipment

We deal in equipment for material handling (forklift, towing tractor, etc.), power generator, air compressor, construction, mining, and agricultural machinery from various reputable global brands.

In these fields of business, we aim to meet various customer needs through our affiliate company, PT Traktor Nusantara.

Service network of PT Traktor Nusantara is widely opened throughout Indonesia and propose excellent and speedy support to customers.

PT Traktor Nusantara propose various service such as sales, long-term and short-term rental, etc. to meet various customer needs.

● BUSINESS FIELDS

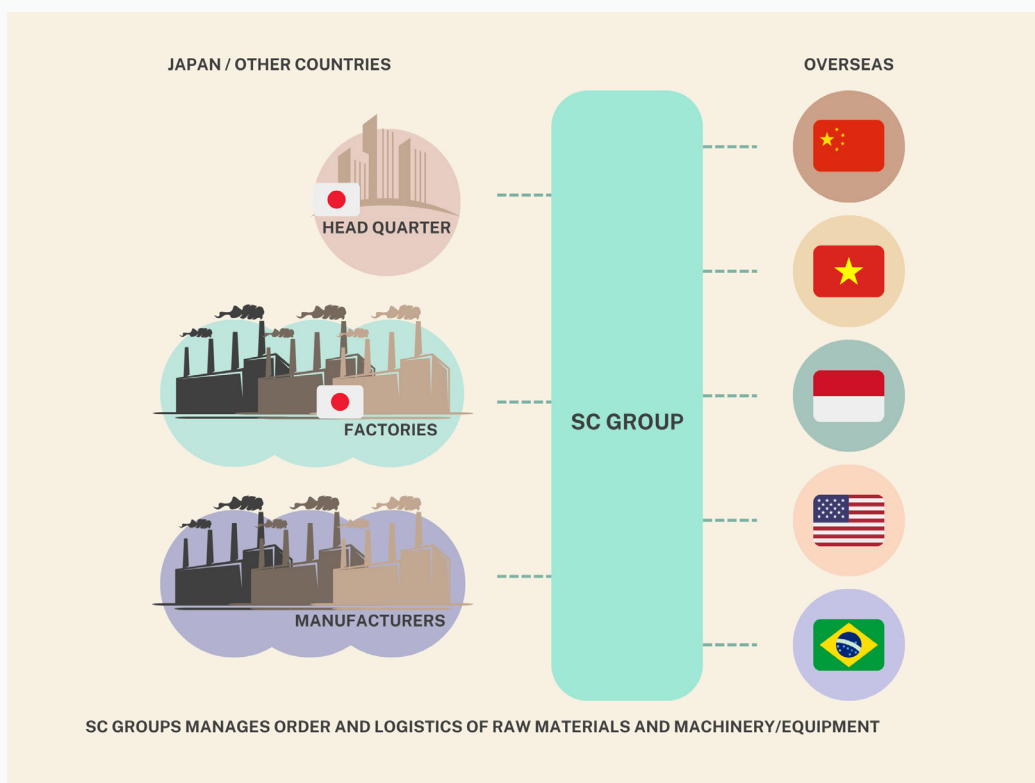

Diverse Urban Development:

Logistics & Social Infrastructure

At PT Sumitomo Indonesia, we are committed to overcoming the challenges of international manufacturing with ease and efficiency. Our expertise lies in **sourcing difficult-to-find materials**, where we excel in procuring specific raw materials or equipment that may not be readily available locally. By leveraging our comprehensive services that encompass both procurement and logistics, we ensure that your production needs are met without any undue burden or expense.

In the realm of **finished goods logistics**, we understand that the transportation of your products is a pivotal aspect of your business operations. Our team of international logistics experts collaborates with the Sumitomo Group's global offices to tailor the most effective transport strategies, ensuring that your products reach their destination promptly and in pristine condition.

Furthermore, our approach to **streamlining inventory control** is designed to enhance operational success. We implement a transparent management system that provides oversight for all procurement and logistics activities related to raw materials, equipment, and finished products. This methodical oversight is instrumental in maintaining optimal inventory levels, minimizing unnecessary costs, and ensuring a seamless supply chain.

Key Benefits

- ◆ Faster Delivery Date.
- ◆ Control Inventory Management.
- ◆ Simplified Management by Regular Transportation.
- ◆ Reduce Shipping Costs by Combine Transportation.
- ◆ Unification of Contacts.
- ◆ Unify the Exchange of a Complicated Multiple Suppliers.

Logistics

Since 1990, Sumitomo Corporation Group has started logistics and industrial park businesses in Indonesia, which resulted in EJIP (PT East Jakarta Industrial Park) as the first project of overseas industrial park businesses in Sumitomo Corporation Group. It is located at Cikarang of Bekasi and currently have around 100 tenants in 320 ha area.

Still in line with EJIP, SGLI (PT Sumisho Global Logistics Indonesia) is also providing logistics service not only to tenants in EJIP but also to the ones in other industrial parks. SGLI provide total logistics services, such as Freight Forwarding (Import & Export), Container Handling, Transportation, Warehousing, to manufacturing companies in industrial park area to enhance their efficient Supply Chain.

● BUSINESS FIELDS

Diverse Urban Development:

Living Related & Real Estate

Sumitomo Corporation Group has played a vital role in Indonesia's development across various sectors since 1985, when it built its first office building, Summitmas I, in Jakarta. The building's modern design attracted foreign companies, leading to the construction of Summitmas II in 1992, with plans for a third building due to strong demand. Beyond property, PT Sumitomo Indonesia is active in sectors like energy-efficient roofing with Galtect, textile materials, biomass fuels, and food products.

Real Estate

In 1985, Sumitomo Corporation Group (PT Summitmas Property /Summitmas I, II) built a building in Jakarta that prides itself on its safety, efficient floor layout and many other cutting-edge functions.

This modern building attracted many foreign companies and made it as their branch office in the country. PT Summitmas Property has successfully maintained their satisfaction.

Riding on the back of a growing economy and increasing demand of commercial properties in Jakarta, PT Summitmas Property built a second office building next to the first one in 1992. Based on the success, marked by a 100% occupancy rate, the third one is being planned to be built.

Living-Related Businesses

1. Building Materials: Galtect

We are selling Japanese metal insulation roof board for residential called Galtect. Galtect has advantages, that are:

- ◆ Higher workability
- ◆ Lightness & Strongness
- ◆ Water-proof performance
- ◆ Thermal insulation performance
- ◆ Modern, Minimalistic, Sharpness design

Galtect has a positive impact in reducing electricity consumption (energy efficiency). Galtect makes it possible to create new value to your residential.

2. Textiles

Supported by the Sumitomo Corporation Group, PT Sumitomo Indonesia delivers a variety of products including textile materials, industry uniforms, work uniforms and related clothing products through our extensive network based on the credibility and proven results established over a long period of time.

3. General Products

PT Sumitomo Indonesia businesses in General Products are covering cellophane film, paper, Biomass fuels, and cement.

In the cellophane film, we are one of the major providers in Indonesian market. As for Biomass fuel business, through co-working with Sumitomo Corporation's Biomass business team, we are handling various fuels such as Palm Kernel Shell (PKS). The SC group's biomass power stations and other major consumers are consuming such biomass fuels.

4. Food Products

In the food area, PT Sumitomo Indonesia delivers a wide variety of agricultural and food products including grain, sugar, bananas, chicken, flour, pre-mixed powders and seafood products, placing the highest priority on consumer safety and security.

To further expand our business and offer integrated solutions to our customers, Sumitomo Corporation Group is actively working on strategic investments in the production and processing of various food products.

Some investments around SEA & Oceanian region include a sugar factory in Thailand, flour mill in Vietnam, wheat company in Australia, and others.

Media & Digital

In Indonesia, our department is responsible for the new business development and venture investments in above domain to support Sumitomo Corporation's related business lines, or group companies. In addition, Sumitomo Corporation has a part of ownership in monotaro.id, one of the leading business-to-business (B2B) E-Commerce companies in Maintenance, Repair and Operations, so called MRO, with category of pantry and office needs in Indonesia.

Coal & Mineral Resources

In the field of mineral resources, PT Sumitomo Indonesia's trading activities cover areas such as coal, carbon products, iron ore, and iron steelmaking raw materials, non-ferrous commodities etc.

Sumitomo Corporation (SC) Group has been establishing strategic partnerships with major mining companies. In Southeast Asia and Oceania, SC Group holds mining rights and operates copper mines and coal mines. SC Group supplies a total of 30 million tons of combined metallurgical and steaming coal per year through its joint-venture mines and its trading activities.

SC Group's portfolio has gradually expanded. With extensive knowledge and experience, SC Group continues to seek future investment opportunities in new resources and develop new coal supply sources in Asia. Meanwhile, in the field of trading, SC Group works closely with its group company, Aegis Energy Trading Pte. Ltd., and Summit Energy & Resources Pte.Ltd. to provide value added trading function.

Chemicals

PT Sumitomo Indonesia continues to drive business success across various sectors through its strong presence in both the Chemicals and Plastics industries. These two departments have played significant roles in meeting the diverse needs of industries domestically and globally, delivering high-quality products, effective supply chain solutions, and innovative services.

Chemicals

Chemicals Department of PT Sumitomo Indonesia is divided into 3 business lines: **Organic Chemicals, Inorganic and Performance Chemicals, and Life Science.**

Organic Chemicals business line delivers top quality of products from a wide range of petroleum & petrochemicals manufacturers to various industries such as paint & coatings, adhesive, ink, fumigant insecticides, polyolefin, synthetic rubbers and others.

The products range over Methacrylates, Styrene Monomer, Liquid Alkyl Benzene, Solvents, Olefin, Aromatic, Petroleum and others.

Inorganic and Performance Chemicals Business Line handles minerals, industrial chemicals, and fine chemicals to basic industries, such as water treatment, glass, ceramics, and food & beverages. Especially, the Business Line has supplied Aluminum Hydroxide from Australia since 2002 mainly for water treatment application.

Life Science Business Line focuses on raw material supply for agriculture and pharmaceutical industries. With Sumitomo Corporation Group's network this Business Line provides the highest quality of products with the best supply chain management service.

Plastics

PT Sumitomo Indonesia Plastic Department started the business operation since 1984 and became one of the biggest main providers of imported plastic resin in Indonesia.

In the beginning, plastic department started operation in Jakarta, Surabaya and Medan. The business managed to gain very significant success with the total annual sales of 10,000 metric tons of Polypropylene (PP) and Polyethylene (PE).

In the early 2000, plastic department engaged transaction with Indonesian local suppliers. Currently, plastic department total handling resin quantity is around 156 KTA. Our total annual sales consist of 60% PP, 30% PE and 10% of other plastic products such as Polycarbonate (PC), PVC Paste, Acrylonitrile butadiene styrene (ABS), Acrylonitrile styrene acrylate (ASA), Polyamide 6/Polyamide 66, rubber, and chemical additives.

Nowadays, our plastic resin sources come from local Indonesia plastic manufacturers, SEA, China, South Korea, Japan, European, and Middle East suppliers with various business customers and end users whose products are stationary, food and beverage, automotive, home appliances, film and packaging, and office automation industries.

Business Development

Our Mission:

To create business opportunities and contribute to society by staying a step ahead and valuing regional perspectives, leveraging our cross-organizational collaborations and strategic partnerships.

Aligned Focus Segments:

Inline with the decarbonization journey of Sumitomo Corporation, Business Development Indonesia focuses on several key segments:

Agriculture

Circular Economy

Health Care

Energy Transformation (EX)

Digital Transformation (DX)

Supply Chain Restructure

Social Infra & Urban Development

We aim to reform our business while creating new business development opportunities by leveraging digital solutions and innovative technologies to drive growth and sustainability.

Human Resources

At PT Sumitomo Indonesia, we believe that people are the cornerstone of our sustainable growth. As part of the global Sumitomo Corporation Group, we are committed to developing our people, enhancing capability, and building a future-ready workforce through continuous learning and empowerment.

Our annual engagement survey is our important agenda that provides valuable insights to strengthen our workplace culture. These efforts are aligned with our Diversity, Equity, and Inclusion (DE&I) commitment, ensuring that all employees feel involved, respected, and valued.

Throughout the year, we celebrate togetherness and Indonesian heritage through events such as Kartini Day and Independence Day, which foster togetherness, appreciation, and a strong sense of belonging across the organization

Risk Management, Legal, Compliance

At Sumitomo Indonesia, we uphold the highest standards of integrity, accountability, and ethical conduct through a strong commitment to Risk Management, Compliance, and Good Corporate Governance.

Our risk management framework proactively identifies and mitigates potential risks, ensuring business resilience and continuity in a dynamic global environment. We maintain strict compliance with laws, regulations on business & logistics, and internal policies, supported by regular training and robust internal controls that promote transparency and accountability.

Our governance structure emphasizes responsible leadership, clear decision-making, and stakeholder engagement, aligning our strategic goals with long-term sustainability and ethical standards.

Through these integrated practices, we build trust and deliver lasting value to our employees, customers, partners, and communities.

Recent Activities in Indonesia

Medical Platform:

Creating healthcare business opportunities in Indonesia and aiming to provide affordable medical and healthcare services to society.

Social Infrastructure & Urban Development:

Focusing on projects that improve urban infrastructure and contribute to sustainable urban development, ensuring efficient resource management and enhanced quality of life for communities.

Agriculture:

Creating impact in the agriculture sector, particularly focusing on how to enhance agricultural productivity and sustainability as value added.

Corporate Social Responsibility (CSR)

Our commitment to a sustainable future is not just a corporate slogan but a guiding principle that shape our actions and initiatives. We are proud to align our Corporate Social Responsibility (CSR) programs with the United Nations' 17 Sustainable Development Goals (SDG's).

- ◆ Quality Education (SDG 4)
- ◆ Clean Water and Sanitation (SDG 6)
- ◆ Reduced Inequalities (SDG 10)
- ◆ Climate Action (SDG 13)
- ◆ Life on Land (SDG 15)

EHON Project

Ehon (絵本) means “picture book” in Japanese. At PT Sumitomo Indonesia, we believe reading is key to building a brighter future. We translate Japanese children book into Bahasa Indonesia. Then we donate and conduct book reading and even train parents to read aloud. We hope to inspire children to read more, think creatively, and grow into a brighter future.

Mangrove Project

PT Sumitomo Indonesia and its group companies are strongly committed to protecting the environment through meaningful CSR programs. Until now, we have planted 155,000 mangrove seeds across 50 hectares in Sumbawa — and this number will continue to grow as we strengthen our efforts to protect coastal ecosystems, mitigate climate change, and support local communities.
