The corporate governance of Sumitomo Corporation (the “Company” or “Sumitomo Corporation”) is described below.

I. Basic Views on Corporate Governance, Capital Structure, Corporate Profile and Other Basic Information

1. Basic Views

The Company recognizes that the aims of corporate governance are improving management efficiency and maintaining sound management, while ensuring management transparency is important in order to secure these aims. Accordingly, the Company is endeavoring to establish corporate governance that will result in management serving the interests of shareholders and all other stakeholders. The Company has already taken steps to strengthen and enhance its corporate governance by such means as reinforcing its audit & supervisory board member system and improving the way it functions, optimizing the size of the Board of Directors, limiting the terms of office of the Chairman and the President and Chief Executive Officer, and introducing an executive officer system. It has also appointed five Outside Directors in order to ensure appropriate decision-making from diverse perspectives in board meetings and further enhancement of the supervisory function. The Company believes that through reinforcing management oversight by independent Outside Directors and Outside Audit & Supervisory Board Members, it will be even better able to achieve its corporate governance-related aims in terms of improving management efficiency, maintaining sound management, and ensuring management transparency. The Company has summarized its basic views and policy with regard to corporate governance as the Sumitomo Corporation Corporate Governance Principles, which it has made public on its website.

(<https://www.sumitomocorp.com/jp/-/media/Files/hq/about/governance/detail/principle.pdf?la=en>)

[Reasons for Non-compliance with the Principles of the Corporate Governance Code]

The Company comply all Principles of the Corporate Governance Code.

[Disclosure Based on the Principles of the Corporate Governance Code]

[Principle 1-3]

The Company, guided by its basic management policy of aiming to continue to enhance corporate value in a

sustainable way, has a capital policy based on retaining an adequate level of shareholders' equity with a view to reinforcement of its financial soundness and effectiveness of its capital. In particular, the Company is working to achieve: (i) the goal of keeping risk-adjusted assets, which represent the maximum possible losses, within the scope of shareholders' equity, which is the core risk buffer and (ii) the targets for the capital efficiency indicators (such as ROE) given under the medium-term management plan.

The Company keeps interest-bearing debt at an appropriate level by paying attention to the balance between cash generated as a result of business activities and asset reduction, and cash necessary for returns to shareholders and loans and investments, etc. for the pursuit of growth strategies.

The Company's basic policy in relation to shareholder returns is to provide shareholders with stable dividends over the long term. We also aim to raise per-share dividend payments by pursuing the growth of profit in the medium to long term.

[Principle 1-4]

The Company takes various considerations into account when making decisions about whether to hold shares in other listed companies for purposes other than pure investment. It fully considers a range of issues, such as whether the shareholding will lead to medium-to-long-term growth in profits as a result of maintaining and strengthening the business relationship with the investee company, from the perspective of investment profit, such as a comparison with the capital cost of individual stocks. Based on the above, the Company reviews the significance of its shareholdings and reports the results thereof to the Board of Directors each year. With regard to stocks for which the significance of shareholdings cannot be confirmed, the Company has a policy of reducing the shareholdings of such stocks.

The Company also takes various considerations into account in accordance with the internal guidelines when making decisions about whether to exercise voting rights. Having fully considered a range of issues from both quantitative and qualitative standpoints, it adequately exercises voting rights for each agenda based on whether exercising voting rights will lead to enhanced medium-to-long-term corporate value at the investee company and the Company—and to enhanced value for its own shareholders.

When a company that holds the Company's stock for purposes other than pure investment indicates to sell or dispose of its holdings, the Company respects such a decision in principle and ensures that their business relationship will not be influenced.

[Principle 1-7]

It is stipulated in laws and regulations and in the Company's internal rules entitled Matters Related to the Administration of Board of Directors that the approval of the Board of Directors must be obtained to conduct business transactions between the Company and its Directors that are competitive or involve conflicts of interest, and if such transactions are executed, key facts regarding the transactions must be reported to the Board of Directors.

[Principle 2-6]

The Company has adopted a defined benefit corporate pension plan (contact type).

It also deploys personnel with financial market and investment experience as investment managers and manages the investment operations of pension assets. When selecting an external asset manager, the Company sufficiently checks investment management track records and management structures including governance while periodically monitoring the conditions of them even after the commencement of investment management operations.

Furthermore, the Pension Management Committee, which is chaired by the Chief Administration Officer and comprised of managers in charge of human resources, finance and accounting organizations, verifies investment results and the financial position of pension assets, reports them to the Management Council and also discloses them to the pension holders.

[Principle 3-1]

(i) Refer to the Sumitomo Corporation Group Management Principles and Activity Guidelines—as well as Sumitomo's Business Philosophy, on which they are based—which the Company makes public on its website (<https://www.sumitomocorp.com/en/jp/about/policy/principles>).

Additionally, refer to the medium-term management plan, which the Company also makes public on its website (<https://www.sumitomocorp.com/en/jp/about/policy/mid-term>).

[Incentives]

Incentive Policies for Directors	Performance-linked Remuneration, Stock Options, Others
----------------------------------	--

Supplementary Explanation

- Performance-linked bonuses
From the viewpoint of strengthening the correlation with the management strategy, the total amount of performance-linked bonuses to be paid to directors and executive officers is determined based on the consolidated net income attributable to the owners of the parent company and the basic profit cash flow for the applicable fiscal year using a calculation method determined by the Board of Directors. The specific amounts to be allocated to individual officers will be determined based on their positions and personal performance and will be paid after the closing of the applicable fiscal year.
To promote personal commitment to the business strategy and corporate performance of the Company, the personal performance of individual directors and executive officers is evaluated based on both financial indicators (to evaluate attainment of the business plan and other activities of the business segment they are in charge of) and non-financial indicators (to evaluate their effort on materiality [key issues] to achieve the sustainable growth of the Sumitomo Corporation Group).
- Stock-linked remuneration
With the aim of strengthening the link with shareholder value and promoting their commitment to

improvement of the medium- and long-term corporate value and the sharing of a common interest with shareholders, the Company grants to directors and executive officers common shares of the Company with a transfer restriction period (“Restricted Stocks”) and performance-linked stock remuneration in which the number of shares issued to them will vary depending on the attainment rate of the predetermined stock performance index (stock price) (“Performance Share Units”).

As directors and executive officers will retain common shares of the Company granted under these stock remuneration plan while they serve as officers of the Company, these plans will encourage them to share the same values as other shareholders.

(a) Restricted stock-based remuneration (Restricted Stock) plan

In principle, each year the Company enters into a transfer restriction agreement (Agreement on Allotment of Restricted Stocks) with each recipient and issues to the recipient a number of shares of the Company determined based on his/her position.

To realize the sharing of shareholder value over the medium and long term, the recipient is restricted in transferring these shares during the period from their issuance to the later of the date when such recipient resigns from all of positions as director, executive officer or any other position designated by the Board of Directors or the date of his/her separation from the Company.

(b) Performance-linked stock remuneration (Performance Share Unit) plan

Based on the calculation method determined by the Board of Directors and affirmed as appropriate by the Audit & Supervisory Board Members, in principle each year the Company grants to directors and executive officers the number of common shares of the Company determined by that calculation method based on the attainment rate of the stock index during the evaluation period of three years (the growth rate of the price of the Company shares during that period).

Policy on Determining Remuneration Amounts and Calculation Methods

Established

Disclosure of Policy on Determining Remuneration Amounts and Calculation Methods

New

The Company's policy for deciding the details of remuneration to be paid to its Directors and Audit & Supervisory Board Members is as follows:

1. Directors' Remuneration

The Company has formulated its executive remuneration plan according to the following basic policy to realize a plan with the aim of reinforcing our group's governance and increasing our corporate value over medium- to long-term, and promoting the Company's sustainable growth in link with our management strategy.

Basic Policy

- By appropriately setting the ratio of fixed remuneration (monthly remuneration) and variable remuneration (performance-linked bonus which is linked to short-term results and share-based remuneration which is linked to medium- to long-term results and shareholder value), the plan shall function as a robust incentive for achieving sustainable growth.
- By reinforcing the relation between our group's management strategy and performance-linked bonus, the plan shall promote the execution of duties that coincide with our management strategy and offer strong motivation for achieving specific business objectives.
- By further reinforcing the interrelation with shareholder value regarding the stock remuneration plan, the plan shall promote efforts to improve our corporate value over medium- to long term and create greater shared values with our shareholders.

Remuneration composition ratios and remuneration standards

- Appropriate ratios should be maintained between the fixed remuneration and the variable remuneration to strengthen their function as incentives to improve the corporate performance and medium/long-term corporate value based on the management strategy of the Company.
- Appropriate remuneration standards should be established based on objective market research data on officer remuneration conducted by an independent research organization and in consideration of the business environment surrounding the Company.

Process to decide officers' remuneration

Regarding remuneration for directors of the Company, the maximum total amount (1,200 million yen in

a year, including 100 million yen to be paid to outside directors in a year) was approved at the 150th general meeting of shareholders held on June 22, 2018. The total amount includes the monthly remuneration, the stock-based remuneration with transfer restriction (Restricted Stocks) and the performance-linked stock remuneration (Performance Share Unit). The specific amount of remuneration to be paid to each director was determined and approved by resolution of the Board of Directors. To further enhance the transparency and objectivity of the decision-making process, details of the remuneration are studied by the Nomination and Remuneration Advisory Committee, an advisory body to the Board of Directors comprising a majority of outside directors. The Board of Directors makes its resolution based on the Committee's proposal.

(1) Remuneration for directors (excluding the Chairman of the Board of Directors and outside directors) Directors' remuneration comprises: monthly remuneration, stock-based remuneration with transfer restriction (Restricted Stocks) and performance-linked stock remuneration (Performance Share Unit).

Monthly Remuneration

Granted each month at a fixed amount to directors according to their position

Directors' Bonuses

From the viewpoint of strengthening the correlation with the management strategy, the total amount of performance-linked bonuses to be paid to directors and executive officers is determined based on the consolidated net income attributable to the owners of the parent company and the basic profit cash flow for the applicable fiscal year using a calculation method determined by the Board of Directors. The specific amounts to be allocated to individual officers will be determined based on their position and personal performance and will be paid after the closing of the applicable fiscal year.

To promote personal commitment to the business strategy and corporate performance of the Company, the personal performance of individual directors and executive officers is evaluated based on both financial indicators (to evaluate attainment of the business plan and other activities of the business segment they are in charge of) and non-financial indicators (to evaluate their effort on materiality [key issues] to achieve the sustainable growth of the Sumitomo Corporation Group).

The specific calculation method is described in [Calculation Method of Remuneration] below.

Stock-linked compensation

With the aim of strengthening the link with shareholder value and promoting their commitment to the improvement of the medium- and long-term corporate value and the sharing of a common interest with shareholders, the Company grants to directors and executive officers common shares of the Company with a transfer restriction period (Restricted Stocks) and performance-linked stock remuneration in which the number of shares issued to them will vary depending on the attainment rate of the predetermined stock performance index (stock price) (Performance Share Units).

As directors and executive officers will retain common shares of the Company granted under these stock remuneration plans while they serve as officers of the Company, these plans will encourage them to share the same values as other shareholders.

- Stock-based remuneration with transfer restriction (Restricted Stock) plan

In principle, each year the Company enters into a transfer restriction agreement (Agreement on Allotment of Restricted Stocks) with each recipient and issues to the recipient a number of shares of the Company determined based on his/her position.

To realize the sharing of shareholder value over the medium and long term, the recipient is restricted in transferring these shares during the period from their issuance to the later of the date when such recipient resigns from all positions as director, executive officer or any other position designated by the Board of Directors or the date of his/her separation from the Company.

- Performance-linked stock remuneration (Performance Share Unit) plan

Based on the calculation method determined by the Board of Directors and affirmed as appropriate by the Audit & Supervisory Board Members, in principle, each year the Company grants to directors and executive officers the number of common shares of the Company determined by that calculation method based on the attainment rate of the stock index during the evaluation period of three years (the growth rate of the price of the Company shares during that period). The specific calculation method is described in [Calculation Method of Remuneration] below.

(2) Chairman's Remuneration

The Chairman's remuneration comprises: monthly remuneration, stock-based remuneration with transfer restriction (Restricted Stocks) and performance-linked stock remuneration (Performance Share Unit).

(3) Outside Directors' Remuneration

The remuneration for outside directors is comprised solely of a fixed amount of monthly remuneration, which is paid on a monthly basis.

2. Audit & Supervisory Board Members' Remuneration

The maximum amount of monthly remuneration to be paid to Audit & Supervisory Board Members is 180 million yen per year, as resolved at the 145th Ordinary General Meeting of Shareholders held on June 21, 2013. Specific amounts for individual Audit & Supervisory Board Members were decided by conference with the Audit & Supervisory Board Members within this limit.

The remuneration for Audit & Supervisory Board Members is comprised solely of a fixed amount of monthly remuneration, which is paid on a monthly basis.

[Calculation Method of Remuneration]

1. Directors' Bonuses

The following calculation formula applies to bonuses paid to directors excluding the Chairman of the Board and outside directors (hereinafter referred to "recipient directors"):

(1) Total amount

The total amount to be paid to directors shall be the lower of (i) and (ii) as follows:

(i) $(X1 + X2 + Y1 + Y2) \times (\text{total position points of all recipient directors divided by } 363.1)$ (any fractional amount less than one million yen shall be rounded down)

X1 = The portion of consolidated net income attributable to owners of the parent company not exceeding 300,000 million yen $\times 50\% \times 0.37\%$

X2 = The portion of consolidated net income attributable to owners of the parent company exceeding 300,000 million yen $\times 50\% \times 1.11\%$

Y1 = The portion of basic profit cash flow not exceeding 300,000 million yen $\times 50\% \times 0.37\%$

Y2 = The portion of basic profit cash flow exceeding 300,000 million yen $\times 50\% \times 1.11\%$; or

(ii) 2,600 million yen

(Note)

1. If the consolidated net income for the year attributable to owners of the parent is negative (i.e., a net loss), or the basic profit cash flow is negative (i.e., net expenditure of cash), the consolidated net income or the basic profit cash flow should be deemed to be "0" for the purpose of this calculation.

2. Basic profit cash flow = Basic profit + Equity in earnings of affiliates + Equity in dividends of affiliates

(2) Specific amount of bonus paid to each director

The total amount of directors' bonuses will be distributed to individual recipient directors proportionately according to the following points designated to individual positions and evaluation of their personal performance (any fractional amount less than 1,000 yen shall be rounded down):

(Bonus for each director = Total amount of directors' bonuses \times adjusted position points of each director reflecting personal performance evaluation / total adjusted position points reflecting personal performance evaluation of all recipient directors)

(Note) Adjusted position points reflecting personal performance evaluation = Position points \times Personal performance evaluation

Position points

Director, President and Chief Executive Officer: 22.1

Director, Executive Vice President: 12.1

Director, Senior Managing Executive Officer: 10

Director, Managing Executive Officer: 8.5

Based on the constituents of directors as of the date of the issuance of this report, the maximum amount that may be paid to each position excluding the personal performance evaluation of each director is as follows:

Director, President and Chief Executive Officer: 158.2 million yen

Director, Executive Vice President: 86.6 million yen

Director, Senior Managing Executive Officer: 71.6 million yen

Director, Managing Executive Officer: 60.9 million yen

2. Performance-linked stock remuneration (Performance Share Unit) plan

The number of shares to be issued to each recipient director is determined by the following formula:

(i) The number of shares to be issued to each recipient (fractions of less than 100 shares are discarded) (hereinafter “shares to be issued”)

Basic shares to be issued \times share issue ratio \times service period ratio

The upper limit for the total number of Company shares to be issued to recipient directors corresponding to each year included in the service period is 180,000 shares per year. If the total number of issued and outstanding shares of the Company increases or decreases as a result of any share consolidation or split (including allotment of shares without contribution), this upper limit of the total numbers of shares to be issued will be adjusted in proportion to such consolidation or split.

The Company will provide monetary remuneration receivables to recipient directors to allot the performance-linked shares, and issue or dispose the Company’s common shares to the recipient directors by making them pay the entire amount of such monetary remuneration receivables as contribution in-kind.

The upper limit for the total amount of cash remuneration paid to recipient directors in each year included in the service period) is 430 million yen.

(ii) Definition of elements used in the calculation of shares issued to each recipient

a. Basic shares to be issued (fractions of less than one share are discarded)

Basic shares to be issued are calculated by: dividing (a) the base amount for each position in the following table by (b) the simple average of the closing price of the Company shares at the Tokyo Stock Exchange during the first month of the evaluation period (June each year)

Position	Base Amount
Chairman of the Board of Directors	22,500,000 yen
Director, President and Chief Executive Officer	22,500,000 yen
Director, Executive Vice President	12,500,000 yen
Director, Senior Managing Executive Officer	10,000,000 yen

b. Share issue ratio (Performance goal attainment level)

As shown in the calculation formula below, the share issue ratio is determined based on the ratio of the Total Shareholder Return of the Company shares during the evaluation period to the growth rate of the TSE stock index (by using the average closing price) during the same period (hereinafter the “growth rate of the Company share price”).

$$\begin{aligned} \text{Growth rate of the Company share price} &= \frac{\text{TSR (Total Shareholder Return) of Company shares during the evaluation period}}{\text{Growth rate of the TSE stock index during the evaluation period}} \\ &= \frac{(B + C) / A}{E / D} \end{aligned}$$

A: Simple average of closing price of the Company shares at the Tokyo Stock Exchange during the first month of the evaluation period (June each year) (*)

B: Simple average of closing price of the Company shares at the Tokyo Stock Exchange during the last month of the evaluation period (June after three years) (*)

C: Total dividends of surplus per share during the evaluation period

D: Simple average of the TSE stock index during the first month of the evaluation period (June each year)

E: Simple average of the TSE stock index during the last month of the evaluation period (June after three years)

(Note) If the total number of issued and outstanding shares of the Company increases or decreases as a result of share consolidation or split (including allotment of shares without contribution), this will be adjusted in proportion to such consolidation or split.

Growth rate of the Company share price	Share issue ratio
Lower than 50%	0%
50% to 150% (inclusive)	Growth rate of the Company share price
Higher than 150%	150%

3. Reasons for Adoption of Current Corporate Governance System

The Company has adopted the audit & supervisory board member system believing that the most legitimate means of improving the effectiveness of its corporate governance is to further reinforce and enhance its corporate auditing framework. As a company with audit & supervisory board members, it has created an auditing system that incorporates a diversity of perspectives in order to reinforce its capacity for conducting checks from an external perspective. To that end, the Company has ensured that three of its five Audit & Supervisory Board Members are Outside Audit & Supervisory Board Members, of whom two are legal experts—a former Prosecutor-General and a former President of Osaka High Court—and one is an accounting expert. In addition to attending meetings of the Board of Directors, Audit & Supervisory Board Members are permitted to attend all internal meetings, enabling them to obtain sufficient information essential for auditing by always participating in important meetings. The Company also appoints five Outside Directors with a range of different experiences and specialties so their diverse perspectives can help ensure appropriate decision-making by the Board of Directors and further enhance the supervisory function. The Company believes that reinforcing management oversight by its independent Outside Directors and Outside Audit & Supervisory Board Members will enable it to better achieve its corporate governance-related aims in terms of improving management efficiency, maintaining sound management and ensuring management transparency.

Guided by Sumitomo's Business Philosophy, the Company set down the Sumitomo Corporation Group Management Principles and Activity Guidelines, with which it endeavors to familiarize all its officers and employees to ensure that they share a set of values—such as compliance with laws and regulations—to be respected throughout the Group. In addition, the Company addressed the issue of sound management, putting in place a framework for complying with laws and regulations by establishing a Compliance Committee and introducing the Speak-Up System, among other measures. Given that it is important for the Company's top executives themselves to demonstrate a lofty sense of ethics in running the Company, the Sumitomo Corporation Corporate Governance Principles specify that the terms of office for the Directors serving as the Chairman, and the President and Chief Executive Officer, should each be a maximum of six years in principle. While valuing its management culture as a Japanese corporation, the Company intends to continue deliberating on the most appropriate form of corporate governance for its own circumstances. In doing so, it will take into account global trends and developments in corporate legislation and use the best aspects of corporate governance in other countries for reference.

Other	<p>[Diversity & Inclusion]</p> <p>With the Fourth Industrial Revolution underway, the structures of industries are changing and becoming more complex, and the borders between businesses are rapidly disappearing in all industries. Against this background, the Company has established "Diversity and Inclusion" as one of the key concepts included in the Medium-Term Management Plan 2020, aiming to implement an advanced personnel strategy to achieve sustainable growth and the development of its businesses. Specifically, the Company respects individual differences among Group employees, and provides and implements programs that provide each employee with opportunities to work on challenging tasks and maximize their strengths.</p> <p>[Active Participation by Women]</p> <p>The Company respects the individuality of employees and promotes their active participation in its business. Upholding the active participation of women as one of its key business strategies, the Company implements</p>

various programs to support women at work. Specifically, recognizing the need to support the balance between family and professional commitments, it provides extensive support systems that exceed legal requirements. Furthermore, it has introduced programs to encourage female employees to play active roles in the Company following their return from maternity and childcare leave. For example, in 2008, we established the Triton Sukusuku Square in-house nursery to provide childcare services for our employees; in 2014, we distributed a handbook to all employees that offers guidance on balancing a career and childcare; and in the same year, we introduced a support program for female employees taking their children with them on overseas assignments. Initiatives such as these have won acclaim and in June 2015 the Company was granted Platinum “Kurumin” certification (*1).

Furthermore, the Company drew up an action plan based on Japan’s Act on Promotion of Women’s Participation and Advancement in the Workplace with the aim of facilitating even greater participation by its female employees. As a result, it was certified as an “Eruboshi” company of the second-highest class in May 2016 (*2).

Details relating to the number and ratios of women working at the Company (parent company only) as of April 1, 2018 are as follows:

No. of female corporate officers: 1

Rate of female employees: 24.5%

Rate of women in key career track positions: 9.1%

Rate of women in managerial roles: 5.9%

The Company aims to increase the percentage of women in managerial roles to between 6% and 7% by the end of FY2019.

(*1) The Platinum “Kurumin” certification system was established in conjunction with the revised Act on Advancement of Measures to Support Raising Next-Generation Children. It offers certification to companies that have already achieved certain standards in their measures to support parents, thereby earning “Kurumin” accreditation, and have gone beyond that to implement measures at an even higher level.

(*2) The “Eruboshi” certification system offers three classes of certification

to companies that have met certain standards, qualifying them as outstanding in terms of promoting active participation by women, as set out in the Act on Promotion of Women's Participation and Advancement in the Workplace.

- Reform of work practices

To maximize the potential of a diverse workforce, it is necessary to support a diversity of work styles. The Company strives to offer work styles that enable employees to achieve fulfillment in both their personal and business life and deliver impressive results while maintaining and enhancing their personal health. To achieve these goals, the Company believes that the promotion of efficient work practices over the short, medium and long term is essential. For example, when young, a person may place greater emphasis on professional development. When older, that same person may place greater weight on his/her private life and life events, such as childcare or family care.

It is the Company's view that it will become increasingly necessary for employees to have flexible options that will allow them to work free of restrictions dictated by time or place, taking into account their work and life-stage situations at any particular time.

In addition, in the context of efficient daily work practice (short-term efficiency) that encourages a mindset of "work hard, rest well," the Company promotes the achievement of impressive business results (productivity improvement) within a finite amount of time, thereby encouraging employees to pursue a fulfilling private life and take care of their health.

One of Sumitomo Corporation's Activity Guidelines is "to comply with laws and regulations while maintaining the highest ethical standards." To ensure that this is put into practice, the Company makes all personnel aware of its basic policy of not yielding to anti-social forces*, but confronting them resolutely, which is set out in the compliance manual distributed to all officers and employees. 2. Other Matters Concerning to Corporate Governance System

The Sumitomo Corporation Corporate Governance Principles stipulate that the essence of corporate governance is improving management efficiency and maintaining sound management, while ensuring management transparency in order to secure these two aims. Furthermore, the Company makes proactive efforts to disclose corporate information in a timely and appropriate manner. Its Corporate Governance Principles state, “In an effort to bring an accurate understanding of the Company’s management policies and business activities to all stakeholders, the Company shall strive to make full disclosure, not limiting itself to the disclosure of information required by law, but also actively pursuing the voluntary disclosure of information.” In accordance with this fundamental approach, the Company has instituted internal rules relating to the handling and disclosure of corporate information. In specific terms, these rules stipulate points to bear in mind and internal procedures relating to timely disclosure as prescribed in the timely disclosure rules of the Tokyo Stock Exchange. The Company also endeavors to ensure appropriate management of corporate information, having instituted internal rules to prevent insider trading, among other measures. As a framework for internal information management, it has put an internal system in place to ensure timely and appropriate disclosure by appointing an individual responsible for information handling in the Corporate Group to gather and centrally manage information.

To provide a means of communicating corporate information internally, the Company has enabled business units and other operating entities to enter information related to financial results directly into the accounting system, from which the data is immediately transmitted and aggregated. Moreover, information related to consolidated financial results from subsidiaries and other consolidated companies can also be entered directly into the Company’s consolidated financial results system by those companies, enabling rapid transmission and aggregation of the data. The reliability of such information is assured by checking it using appropriate business procedures and internal accounting rules based on generally accepted corporate accounting standards.

Other material corporate information is transmitted to and aggregated in the Corporate Group pursuant to internal rules, and using previously determined means. Information thus gathered is promptly reported to the Executive Officer in charge of information disclosure, and depending on the nature of the information, including its content and materiality, the Executive Officer issues instructions to the individual responsible for information handling regarding whether the information in question requires timely disclosure, and if so, the method to be used. If any inadequacies or difficulties arise with regard to the internal procedures or organization, the relevant departments consult with each other and promptly enact countermeasures.

The Company’s internal systems with regard to transmission, and timely and appropriate disclosure, of material corporate information are as detailed above, but the Company is continuing efforts to further improve its internal control systems.
